

Safety-Lancet – The new generation

Safe and easy sampling with increased patient comfort

Safety for both user and patient

- The sterile needle or blade is safely concealed in the lancet body before and after use, preventing the risk of needlestick injury
- Automatic locking feature eliminates re-use and cross-infection

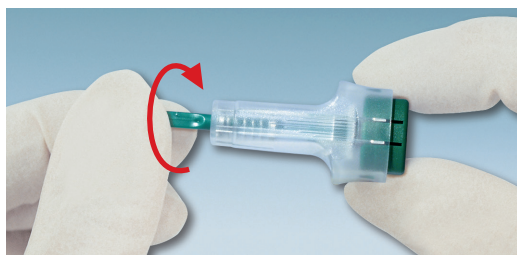

Easy sampling

- Primed and ready for use
- Secure firing button prevents accidental activation
- Ridged lancet body ensures safe grip
- Small contact face for precise puncturing

Patient comfort

- Smooth siliconised blades and triple-sharpened needlepoints to minimise pain
- Defined penetration depths for optimal sampling from adults and children
- Controlled penetration depth to eliminate the risk of bone injury

Safety-Lancet – The new generation

- 1 Twist the cap until it separates from the Safety-Lancet.

- 2 Press the Safety-Lancet firmly against the chosen and cleaned puncture site and press the firing button.

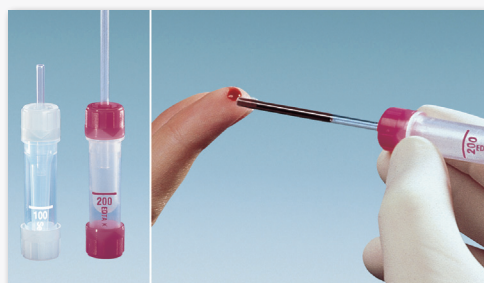

- 3 Dispose of the Safety-Lancet into a sharps container.
